Komodo Edit 10.0.0 Build 17209 Download For Mac

The command+shift+down shortcut in Komodo Edit 10.0.0 works usually, but command word+shift+up will not highlight any text. x launch: Analyzed most lately with Komodo 10.0.0 on Macintosh Operating-system 10. This facelift isn't simply about producing Komodo more appealing and pleasurable to make use of; a bunch of consumer experience work has gone into the facelift. This issue affects Komodo Edit 10.0.0 and also appeared in Komodo Edit 9.3: In Macintosh OSX applications, order+shift+down features text message from the text message cursor place to the base of a record, and command+shift+up shows text from the text message cursor place to the top of a document. What's fresh in this version: New User Interface: - The whole user interface has become given a large facelift. This used to work in Komodo 8 and earlier variations, and had been fixed in this commit for the 9.
